Register for 2 PM ET

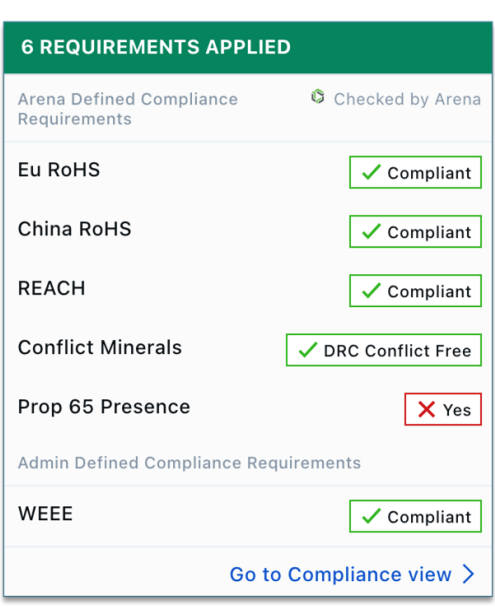

Introducing Arena's AI Engine

Save time and boost productivity with our first phase of AI-powered features:

- Quickly compare and summarize files managed in Arena
- You're in control—enable AI features when you're ready through the system administrator

Explore the Latest in Supply Chain Intelligence (SCI)

- Automated component compliance (a major SCI upgrade!)
- Enhanced support for DataExtract and analytics

New Features for Everyone

This release delivers improvements across the board:

- BOM history
- Quality process workflow controls
- Modernized UI/UX for all world list main pages
- Scheduled automations triggered by dates
- Analytics support for GovCloud
- Arena Help and AI Assistant for a smoother experience
- Expanded attribute groups for supplier items
- Support for Onshape flat pattern files
